

## Do facts speak for themselves?

Join the International Science Summer Camp 2022 at Petnica Science Center and find out!

2022 ISSC is finally back after a two year break to provide an opportunity for young people interested in science to learn about different cultures and ideas and doing research through theory and practice.

This year's topic is "**Beyond the data**" – learn about the process of getting data-information-facts-knowledge, improve your critical thinking and data visualization skills, discuss the scientific method, methodology and popular science and much more, all through practical examples from different fields of science.

The ISSC 2022 is a MILSET Europe activity organized at Petnica Science Center, an independent nonprofit organization for extracurricular, formal and informal, science education in more than 15 disciplines of science, technology and the humanities, located near Valjevo, Serbia.

The program is open for participants aged between 18 and 25 years old who are interested in science. All activities are in English.

**Dates:** 1st to 7th August 2022

**Location:** Petnica Science Center, Petnica, Serbia

**Fee:** 220€/pers. (incl. food and board, local transportation and all program activities)

**Registration deadline:** 15th June (first in, first served)

**Website and registration link:** <https://issc2022.milset.org>
